Subject Park City Approval for Richardson Flat Roadway

Mo:

I hope you are doing well.

We have recently completed the administrative work needed for Task 1 at Richardson Flat. As you may know, that includes the Park and Ride Lot for Park City as well as the paving of the County roadway through Richardson Flat. Park City is paving a portion of the roadway and is seeking Federal Transportation Authority money to help fund the project.

They have made their application to the FTA. The FTA has asked for both EPA and Utah DEQ approval for the project.

I am going to have delivered to your office the completion documents and the plans for the Park and Ride and the roadway improvements.

I am not sure if an approval is something that you can do but perhaps some representation that you support the re-use of this area and the roadway reconstruction would take care of the FTA needs.

Please call if you have any questions.

Thanks

Kerry
